Baseline: the window
±45 lines, as deployed
0.06
Intervention 1
read the entire citing paper
0.29
+0.20
[+0.09, +0.36]
Intervention 2
add a “does not say” verdict
0.06
+0.01
[-0.07, +0.11]
Intervention 3
compose the rule
0.09
+0.02
[+0.00, +0.05]
Intervention 4
9 open-weight checkpoints
0.09
no change
inter-judge Fleiss' κ
0.0
0.2
0.4
0.6
0.8
Only evidence moves it, and not far enough. The residue is the distance to prose that states its coordinates.
